Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).

Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).

Control of PAHs from Incineration by Activated Carbon Fibers — Zhen-Shu Liu; 132 (5), 463-9 (2006).

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).

Advection

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Aeration

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Aerobic treatment

Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).

Aggregates

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Air flow

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Air pollution

Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Air water interactions

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Alkalinity

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Aluminum

Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Ammonia

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Anaerobic treatment

Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Anemometers

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Aquifers

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations— Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Arid lands

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Arizona

EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

Aromatic hydrocarbons

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Arsenic
Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Asphalt cement
Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Attenuation
Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Bacteria
Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Baffles
Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Barriers
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Beaches
Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).

Best management practices
Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Bifurcations
Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Biochemical oxygen demand
Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Biodegradation
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Biodegradation of Phenol with Wastewater as a Co-substrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).

Biofilm
Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Biological treatment
Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei

Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).

Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Biomass

Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Blasting

Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Boreholes

Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Boundary shear

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Bubbles

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Cadmium

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Calibration

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

California

Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Canada

Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Carbon

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Carbon monoxide

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Carbons

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Case reports

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Cast iron

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Channel flow

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Chemical treatment

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Chemicals

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Chesapeake Bay

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Chlorides

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Chlorination

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Chlorine

Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Chromium

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and

Marc Edwards; 132 (5), 489-96 (2006).

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Clays

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Climatology

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Clogging

Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Closed form solutions

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Coagulation

Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Coastal management

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Coefficients

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Colloids

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Color

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).

Columns

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Combustion

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Compacted soils

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Comparative studies

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Competition

EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Compressive strength

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Computation

Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Computer models

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Computer software

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Computers

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Concrete

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Construction industry

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Containment

Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Contaminants

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Oxidation of Methyl *Tert*-Butyl Ether in Aqueous Solution by an Ozone/UV Process — Temesgen Garoma and Mirat D. Gurol; 132 (11), 1404-12 (2006).

Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Contamination

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations— Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Contractors

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Copper

Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Correlation

Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Corrosion

Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Costs

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Crops

Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Crude oil

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Data analysis

Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Data collection

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Decision making

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Decomposition

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Degradation

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Deicing

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Denitrification

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Denmark

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Density

Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Density currents

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Desalination

Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Design

Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Design criteria

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Desorption

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Detention basins
Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Developing countries
Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Dewatering
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Diffusion
Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Digestion
Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Dilution
Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Dioxin
Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Disinfection
MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Dispersion
Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Dissolved organic carbon
Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

Dissolved oxygen
Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).

Dolomite
Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Dust
Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Dyes
Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Dynamic models
Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).

Ecology
Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Economic factors
Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Efficiency
Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Effluents
Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

EDTA, NTA, Alkylphenol Ethoxylate and DOC At-

tenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Egypt

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Electrical conductivity

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Electrokinetics

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Emissions

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Energy dissipation

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Engineering education

Educating Engineers to Create a Sustainable Future — Paul H. Woodruff; 132 (4), 434-44 (2006).

Environmental impacts

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Environmental issues

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Errors

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Estimation

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Estuaries

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Evaluation

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Evaporation

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway, Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Evolutionary computation

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Experimentation

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Explosives

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Extraction procedures

Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Fibers

Control of PAHs from Incineration by Activated Carbon Fibers — Zhen-Shu Liu; 132 (5), 463-9 (2006).

Field investigations

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Filters

Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Filtration

Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).

Floating bodies

Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Flocculation

Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Floods

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Florida

Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Flow patterns

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Flow simulation

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Fluid flow

Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).

Fluidization

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Fluidized beds

Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).

Fluoridation

Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Fly ash

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Foams

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway, Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Furrow irrigation

Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Fuzzy sets

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Gas

Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Gas recovery

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Geographic information systems

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Geomembranes

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Geomorphology

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Geosynthetics

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Granular media

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Ground water

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Ground-water chemistry

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Ground-water management

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Ground-water pollution

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Oxidation of Methyl *Tert*-Butyl Ether in Aqueous Solution by an Ozone/UV Process — Temesgen Garoma and Mirat D. Gurol; 132 (11), 1404-12 (2006).

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Ground-water quality

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Ground-water recharge

Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock, Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Halogen organic compounds

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Harbors

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Hardness

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Hawaii

Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock, Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Hazardous wastes

Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Hazards

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Health hazards

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Heat treatment

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Heavy metals

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Herbicides

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Highways

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Hudson River

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Hybrid methods

Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Hydraulic conductivity

Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic

Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Hydrocarbons

Control of PAHs from Incineration by Activated Carbon Fibers — Zhen-Shu Liu; 132 (5), 463-9 (2006).

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Hydrodynamics

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Hydrogen

Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Hydrogen sulfides

Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).

Hydrogeology

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Hydrology

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Imaging techniques

Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

In situ tests

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Incineration

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

India

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Industrial plants

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Industrial wastes

Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).

Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Industrial water

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Inflow

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Inorganic chemicals

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).

Ion exchange

Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Iron

Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000 (2006).

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Irrigation practices

Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Isotherms

Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).

Isotopes

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock, Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Israel

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Kinetics

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La

Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Laboratory tests

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Lakes

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields, and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Laminar flow

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Land usage

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Landfills

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Leaching

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Lead

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Leakage

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Lime

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Linings

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Mass transfer

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Massachusetts

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Material properties

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Mathematical models

PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Measurement

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Mechanical properties

Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Membranes

Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Mercury

Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).

Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).

Metals

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Methane

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Methodology

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Microbes

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Microscopy

Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Mine wastes

Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).

Mixed wastes

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Mixing

Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Model analysis

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Model studies

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Models

Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Monitoring

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Mortars

Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Municipal wastes

Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Natural gas

Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Nevada

Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).

Nigeria

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Nitrates

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Nitrification

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Bio-

logical Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Nitrogen

Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Nonaqueous phase liquids

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Nonpoint pollution

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Numerical analysis

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Numerical models

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields, and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Nutrient loads

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Nutrients

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).

Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).

Occupational safety

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Odors

Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Ohio

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Oil spills

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Oils

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

One-dimensional models

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Optimization

Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Optimization design

Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).

Organic carbon

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Organic chemicals

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Organic compounds

Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Organic loads

Microbial Adaptability to Organic Loading Changes in an Enhanced Biological Phosphorus Removal Process — Chang Hoon Ahn, Jae Kwang Park, and Kwang Soo Kim; 132 (8), 909-17 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Organic matter

Removal of Immiscible Contaminants from Sandy Soils Monitored by Means of Dielectric Measurements — Víctor A. Rinaldi and Franco M. Francisca; 132 (8), 931-9 (2006).

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Evaluation of Sludge Yield and Phosphorus Removal in a Cannibal Solids Reduction Process — Ramesh K. Goel and Daniel R. Noguera; 132 (10), 1331-7 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Overland flow

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Oxidation

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).

Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).

Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Oxidation of Methyl *Tert*-Butyl Ether in Aqueous Solution by an Ozone/UV Process — Temesgen Garoma and Mirat D. Gurol; 132 (11), 1404-12 (2006).

Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Oxygen

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Oxygen demand

Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).

New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Oxygen transfer

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Ozone

Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Ozonization

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Paper mills

Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).

Parameters

Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Particle size

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).

Particle size distribution

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Particles

Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).

Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanu-

kitch, and S. Heslop; 132 (3), 350-7 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Pavement design

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

PCB

PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

PCE

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

PCP

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Pennsylvania

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Performance characteristics

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Pesticides

Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).

pH

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Phenol

Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Biodegradation of Phenol with Wastewater as a Co-substrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).

Phosphorus

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Microbial Adaptability to Organic Loading Changes in an Enhanced Biological Phosphorus Removal Process — Chang Hoon Ahn, Jae Kwang Park, and Kwang Soo Kim; 132 (8), 909-17 (2006).

Removal of Immiscible Contaminants from Sandy Soils Monitored by Means of Dielectric Measurements — Víctor A. Rinaldi and Franco M. Francisca; 132 (8), 931-9 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Evaluation of Sludge Yield and Phosphorus Removal in a Cannibal Solids Reduction Process — Ramesh K. Goel and Daniel R. Noguera; 132 (10), 1331-7 (2006).

Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields, and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Poisson ratio

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Pollutants

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard, Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).

Pollution

Control of PAHs from Incineration by Activated Carbon Fibers — Zhen-Shu Liu; 132 (5), 463-9 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Polyethylene

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Polymers

Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Porous media

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000

(2006).

Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).

Potable water

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Precipitation

Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Predictions

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Pressures

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Probability

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Professional practice

Educating Engineers to Create a Sustainable Future — Paul H. Woodruff; 132 (4), 434-44 (2006).

Public health

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Quality control

Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Radioactive wastes

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway, Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Reactors

Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Dyed-Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

Reaeration

Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).

Recharge basins

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Reclamation

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Recycling

Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Regression analysis

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Regression models

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Regulations

New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Reliability

Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Remedial action

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).

Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Reservoirs

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Risk management

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Rivers

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway, Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).

Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).

Rocks

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Rubber

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Runoff

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard, Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Salinity

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Sampling

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Sand

Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Sediment

PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields, and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Sediment load

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Sedimentation

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Sedimentation tanks

Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Settling velocity

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Sewage

Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).

Shear stress

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Shore protection

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Silica

Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Simulation

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Simulation models

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Slag

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Slopes

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Sludge

Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).

Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).

Snow

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Snowmelt

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Snowpacks

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Sodium

Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Softening

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Soil analysis
Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Soil cement
Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Soil gas
Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Soil mixing
Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Soil permeability
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Soil pollution
PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Citric Acid Enhanced Remediation of Soils Contaminated with Uranium by Soil Flushing and Soil Washing — Cetin Kantar and Bruce D. Honeyman; 132 (2), 247-55 (2006).

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).

EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Soil treatment
Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Soils
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Solid waste
Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Solid wastes
Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Solids
The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Solvents
Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Sorption
Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).

Simultaneous Removal of Cd and Cr(VI) Using Fe-Loaded Zeolite — Seunghak Lee, Kwanghun Lee, and Junboum Park; 132 (4), 445-50 (2006).

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in

Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Stability

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Standards

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Statistical models

Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Stones

Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Storage tanks

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Storm sewers

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Stormwater management

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Stratification

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Streams

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Subsurface environment

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Sulfates

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Sulfur

Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).

Surface-active agents

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Suspended solids

Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).

Sustainable development

Educating Engineers to Create a Sustainable Future — Paul H. Woodruff; 132 (4), 434-44 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Sweden

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

TCE

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Temperature

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Temperature effects

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Tennessee

Concentration–Duration–Frequency Curves for pH

in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Texas

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Thermal stratification

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Thermodynamics

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Three-dimensional models

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Tides

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Time series analysis

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Tourism

Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Toxicity

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Tracers

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock, Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Transformations

Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).

Transport rate

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Trickle irrigation

Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Trickling filters

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Trihalomethanes

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Turbulence

Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Ultrasonic methods

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Ultraviolet radiation

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).

Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).

Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Uncertainty principles

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Underground storage

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Uniform flow

Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).

Unsaturated soils

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Uranium

Citric Acid Enhanced Remediation of Soils Contaminated with Uranium by Soil Flushing and Soil Washing — Cetin Kantar and Bruce D. Honeyman; 132 (2), 247-55 (2006).

Urban areas

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Urban development

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Urbanization

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard, Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Vadose zone
Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Validation
Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Vapor
Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Vegetation
Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Vehicles
Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Velocity
Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).

Virginia
Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).

Viruses
MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Volatile organic chemicals
Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).

Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Volatilization
PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Washing
EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Waste disposal
Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Waste management
Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper, R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Waste stabilization ponds
Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Waste storage
Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Waste treatment
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Wastewater
Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Wastewater management
Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).

Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).

Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).

Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).

Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).

Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock, Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).

Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Biodegradation of Phenol with Wastewater as a Co-substrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).

Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Wastewater treatment

Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Water distribution systems

Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Water flow

Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Water management

Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).

Water pollution

PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).

Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard, Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Water quality

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Water reuse

Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).

Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U.

Zoller; 132 (6), 683-8 (2006).

Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Water sampling

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Water treatment

Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John. C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt , Edward J. Bouwer , Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).

Simultaneous Removal of Cd and Cr(VI) Using Fe-Loaded Zeolite — Seunghak Lee, Kwanghun Lee, and Junboum Park; 132 (4), 445-50 (2006).

Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab; 132 (6), 653-63 (2006).

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).

Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000 (2006).

Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).

Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Water treatment plants

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Watershed management

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard, Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Wildlife

Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Wood preservatives

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Zinc

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Author Index

Abichou, Tarek
Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Acharya, C.
Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Adam, Michael
Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Adams, Barry J.
Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Ahlfeld, David P.
Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).
Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Ahn, Chang Hoon
Microbial Adaptability to Organic Loading Changes in an Enhanced Biological Phosphorus Removal Process — Chang Hoon Ahn, Jae Kwang Park, and Kwang Soo Kim; 132 (8), 909-17 (2006).

Aisien, F. A.
Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Ajbar, AbdelHamid
Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Alam, Mahbub
Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Albergo, Nicholas
AAI and the Necessity for an Opinion regarding Additional Investigation as Part of the Performance of an ASTM E1527-05 Phase I Environmental Site Assessment — Nicholas Albergo; 132 (12), 1547-9 (2006).

Albro, Carl S.
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Alhumaizi, Khalid
Optimization of an Unstructured First-Order Kinetics Model of Cyclically Operated Bioreactors — Khalid Alhumaizi and AbdelHamid Ajbar; 132 (5), 453-62 (2006).

Alleman, J. E.
Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Almqvist, Helena
Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Alonso, Cristina
PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Alvarez, Pedro J.
Nanotechnology in the Environment—The Good, the Bad, and the Ugly — Pedro J. Alvarez; 132 (10), 1233 (2006).

Amrhein, Christopher
Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Amy, Gary L.
Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Anand, Gunwant Singh
Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Apitz, Sabine E.
Parsing Ecological Impacts in Watersheds — Victor S. Magar, Richard J. Wenning, Charlie Menzie, and Sabine E. Apitz; 132 (1), 1-3 (2006).

Arnold, Robert G.
Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Arnold, William A.
High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Audic, Jean-Marc
Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Aulenta, Federico
Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Babcock, Roger, Jr.
Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock Jr., Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Bachman, Brenda
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Bagchi, Rajesh
Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Balakrishnan, K.
Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Banks, Margaret Katherine
Editor's Note — Margaret Katherine Banks; 132 (1), 4 (2006).
Editor's Note — Margaret Katherine Banks; 132 (2), 157 (2006).
Editor's Note — Margaret Katherine Banks; 132 (3), 291 (2006).
Editor's Note — Margaret Katherine Banks; 132 (4), 433 (2006).
Editor's Note — Margaret Katherine Banks; 132 (5), 433 (2006).
Editor's Note — Margaret Katherine Banks; 132 (6), 567 (2006).
Editor's Note — Margaret Katherine Banks; 132 (7), 703 (2006).
Editor's Note — Margaret Katherine Banks; 132 (8), 830 (2006).
Editor's Note — Margaret Katherine Banks; 132 (9), 970 (2006).
Editor's Note — Margaret Katherine Banks; 132 (10), 1234 (2006).
Editor's Note — Margaret Kathy Banks; 132 (12), 1553 (2006).

Barnard, J. L.
Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).
Bartelt-Hunt, Shannon L.
Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).
Bartlett, Justin
Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).
Bassi, A.
Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).
Batiuk, Richard
Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).
Belovich, Joanne M.
Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).
Benson, Craig H.
Prions: Novel Pathogens of Environmental Concern? — Joel A. Pedersen, Katherine D. McMahon, and Craig H. Benson; 132 (9), 967-9 (2006).
Béranger, Sandra C.
Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).
Bergstrom, Donald E.
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).
Berthouex, P. M.
Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).
Bhandari, Alok
Diversity in Environmental Engineering—Successes and Challenges — Alok Bhandari, Sharon A. Jones, Lee W. Clapp, Donna E. Fennell, and Timothy M. LaPara; 132 (7), 701-2 (2006).
Bhattacharyya, Debraj
Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).
Bielefeldt, Angela R.
Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).
Bigger, Stephen W.
Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).
Birkelund, Vibeke
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).
Bishop, Paul L.
Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).
Blais, Jean-François
Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).
Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).
Blatchley, Ernest R., III
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).
Bloom, Michael
Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).
Bob, Mustafa
Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).
Bohrerova, Zuzana
Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).
Boillat, Jean-Louis
Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).
Bolton, James
Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).
Boltz, Joshua P.
The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).
Borguet, Eric
Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).
Bose, Gaurav
Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).
Bose, Purnendu
Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000 (2006).
Boufadel, Michel C.
Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).
Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).
Bouwer, Edward J.
Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).
Bower, Kevin C.
Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).
Boyd, Stephen A.
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, II, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).
Boyle, Carol
The Catch-22 of Engineering Sustainable Development — Richard Donnelly and Carol Boyle; 132 (2), 149-55 (2006).
Brennan, Rachel A.
Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).
Brezonik, Patrick L.
Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).
Brion, Gail
Seeing the Elephant — Gail Brion; 132 (2), 156 (2006).
Brooks, Michael C.
Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Debo-

rah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Brown, Andrea J.

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Brusseau, Mark L.

Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Cacho Rivero, Jesús A.

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Calloway, Bond, Jr.

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Campbell, Brian K.

Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).

Campos, Luiza C.

Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).

Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Caplow, Ted

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Caravelli, Alejandro

Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Carter, Stephen

Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Cassada, David

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Cerco, Carl

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Cha, Dong-Hoon

Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Chang, Feng-Yueh

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Chanona, J.

Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).

Chanton, Jeffery

Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Chao, Keh-Ping

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Chao, Xiaobo

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields Jr., and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Characklis, Gregory W.

Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Chartier, Myriam

Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Chen, Guohua

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Chen, Hua-Wei

Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Chen, Jieyun

Analytical Urban Storm Water Quality Models Based on Pollutant Buildup and Washoff Processes — Jieyun Chen and Barry J. Adams; 132 (10), 1314-30 (2006).

Chen, Ko-Wei

Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Chen, Kuo-Cheng

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Chen, Liang-Chuan

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Chen, Shyi-Tien

Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Cheng, Han-Tsung

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Chiang, Chow F.

Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Chien, Yi-Chi

Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Chipello, Peter L.

Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

Choi, Christopher Y.

Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Chou, Shan-Shan

Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Chowdhury, Shakhawat

Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Christensen, Erik R.

Use of GIS in Urban Storm-Water Modeling — Indranil Seth, Puripus Soonthornnonda, and Erik R. Christensen; 132 (12), 1550-2 (2006).

Chu, Hsin

Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Chu, Xuefeng

Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in

Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).

Clapp, Lee W.

Diversity in Environmental Engineering—Successes and Challenges — Alok Bhandari, Sharon A. Jones, Lee W. Clapp, Donna E. Fennell, and Timothy M. LaPara; 132 (7), 701-2 (2006).

Clayton, Wilson

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Cokgor, Emine Ubay

Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Collick, Amy S.

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Comfort, Steve

Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Cooper, Charles M.

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields Jr., and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Cort, Todd L.

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Cowie, Iain

Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab Jr.; 132 (6), 653-63 (2006).

Crowder, Mark L.

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Culver, Teresa B.

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Cumming, Lydia

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Cussler, Edward L.

High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Dandamudi, Manoj

Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).

Dao, Hien V.

Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Davis, Jeffrey L.

Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Day, Laurence

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

De Cesare, Giovanni

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

DeJong, Jason T.

Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

de Kreuk, Merle K.

Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).

Delebarre, Arnaud

Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).

Den, Walter

Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Deng, An

Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).

Deng, Xiaolin

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

DeVantier, Bruce A.

Role of Hydraulics and Fluid Mechanics in Environmental Engineering Publications — Bruce A. DeVantier; 132 (4), 431-2 (2006).

Devlin, J. F.

Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).

DiLorenzo, Joseph L.

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Diodato, Nazzareno

Spatial Uncertainty Modeling of Climate Processes for Extreme Hydrogeomorphological Events Hazard Monitoring — Nazzareno Diodato; 132 (11), 1530-8 (2006).

Donnelly, Richard

The Catch-22 of Engineering Sustainable Development — Richard Donnelly and Carol Boyle; 132 (2), 149-55 (2006).

Dougherty, Mark

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Drewes, Jörg E.

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Drnevich, Vincent P.

Incorporating Realism into Senior Design — Vincent P. Drnevich; 132 (8), 825-9 (2006).

Drogui, Patrick

Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

Droste, R. L.

Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).

Ducoste, Joel J.

Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Dymond, Randel L.

Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Dzombak, David A.

Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).

Easton, Zachary M.

Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Ebewele, R. O.

Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Echegoyen, Luis. A.
Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).
Edwards, Marc
Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).
Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).
Ela, Wendell P.
Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).
Elliott, Allan
Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).
El Sherbiny, Ahmed H.
Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).
Empie, H. Jeff
Improving Fluid Flow in Clarifiers Using a Highly Porous Media — Brian K. Campbell and H. Jeff Empie; 132 (10), 1249-54 (2006).
Englehardt, James D.
Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).
Eremektar, F. Gulen
Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).
Ergas, Sarina J.
Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).
Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).
Escoriaza, Sharon
Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).
Eskicioglu, C.
Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).
Fang, Qian
MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).
Fang, Shiyue
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).
Felt, Deborah R.
Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).
Feng, Wenguo
Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).
Feng, Xue
Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).
Fennell, Donna E.
Diversity in Environmental Engineering—Successes and Challenges — Alok Bhandari, Sharon A. Jones, Lee W. Clapp, Donna E. Fennell, and Timothy M. LaPara; 132 (7), 701-2 (2006).
Ferrer, J.
Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).
Finžgar, Neža
Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).
Fisher, Timothy S. R.
Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).
Fletcher, H. R.
Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).
Fouad, Fouad H.
Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).
Fox, James F.
Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).
Fox, Peter
Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).
Francisca, Franco M.
Removal of Immiscible Contaminants from Sandy Soils Monitored by Means of Dielectric Measurements — Víctor A. Rinaldi and Franco M. Francisca; 132 (8), 931-9 (2006).
Frederiksen, Harald D.
Closure to "Addressing Water Crisis in Developing Countries" by Harald D. Frederiksen — Harald D. Frederiksen; 132 (6), 698-9 (2006).
Fredette, Thomas
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).
Fries, J. Stephen
Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).
Fritsen, Chris
Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).
Gabriel, Steven A.
Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).
Galal, Ahmed
Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).
Gali, Veeresh S.
Biodegradation of Phenol with Wastewater as a Cosubstrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).
Gallagher, Thomas W.
Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).
Gao, Bin
Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).
Garoma, Temesgen
Oxidation of Methyl *Tert*-Butyl Ether in Aqueous Solution by an Ozone/UV Process — Temesgen Garoma and Mirat D. Gurol; 132 (11), 1404-12 (2006).
Garvin, N. L.
Minimizing Mass Transfer Effects in Granular Iron Batch Tests Using GEM Reactors — N. L. Garvin and J. F. Devlin; 132 (12), 1673-6 (2006).
Gellner, W. James, II
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, II, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Gerba, Charles P.
Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Giannuzzi, Leda
Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Ginestet, Philippe
Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Girand, Matthew
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, II, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Godrej, Adil N.
Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Goel, Ramesh K.
Evaluation of Sludge Yield and Phosphorus Removal in a Cannibal Solids Reduction Process — Ramesh K. Goel and Daniel R. Noguera; 132 (10), 1331-7 (2006).

Gorantiwar, S. D.
Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Graham, Nigel J. D.
Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).
Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Grant, S. R.
Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).

Grégori, Gérald
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Grigoropoulos, Sotirios G.
Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Grizzard, Thomas J., Jr.
Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Guan, Yousheng
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Gunaratna, Nilupa
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Gupta, Ajay Kumar
Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Gurol, Mirat D.
Oxidation of Methyl *Tert*-Butyl Ether in Aqueous Solution by an Ozone/UV Process — Temesgen Garoma and Mirat D. Gurol; 132 (11), 1404-12 (2006).

Guza, Olga
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Haas, Charles N.
Toxic and Contaminant Concerns Generated by Hurricane Katrina — Danny D. Reible, Charles N. Haas, John H. Pardue, and William J. Walsh; 132 (6), 565-6 (2006).

Halley, James M.
Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Hanæus, Jörgen
Organic Hazardous Substances in Graywater from Swedish Households — Helena Almqvist and Jörgen Hanæus; 132 (8), 901-8 (2006).

Harada, Hideki
Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar , Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Harper, Willie F., Jr.
Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper Jr., R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Harrington, Gregory W.
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Hart, Brian K.
Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Hassan, Ali N.
Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Hassan, Kazi Z. A.
Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).

Hausler, Robert
Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).

Havet, Michel
Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Hayden, Nancy J.
Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).
Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Healy, Mark Gerard
Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Hedström, Annelie
Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).

Henry, Thomas
Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Heslop, S.
Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).

Himeno, Shuji
Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).

Hinlein, Erich S.
Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Ho, David T.
Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Holbrook, R. David
Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper Jr., R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Holst, Troy
Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Hondzo, Miki
Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Honeyman, Bruce D.
Citric Acid Enhanced Remediation of Soils Contaminated with Uranium by Soil Flushing and Soil Washing — Cetin Kantar and Bruce D. Honeyman; 132 (2), 247-55 (2006).

Hossain, Md. Akram
Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Houghton, Robert W.
Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Hsieh, M.-J.
Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Hsu, C.-Y.
Fate and Modeling of Pentachlorophenol Degradation in a Laboratory-Scale Anaerobic Sludge Digester — Shyi-Tien Chen, C.-Y. Hsu, and P. M. Berthouex; 132 (7), 795-802 (2006).

Hu, Alan Y.
Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Hu, Jing
Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).

Huang, Chihpin
Electrocoagulation of Silica Nanoparticles in Wafer Polishing Wastewater by a Multichannel Flow Reactor: A Kinetic Study — Walter Den and Chihpin Huang; 132 (12), 1651-8 (2006).

Huang, Frank Y. C.
Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Huang, Ju-Sheng
Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).

Huang, Poshu
Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Huang, Xinjiang
Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Huang, Yong H.
Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Hundal, Lakhwinder S.
Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).

Hung, Wen-Chi
Catalytic Incineration of Acrylonitrile with Platinum Supported on Al_2O_3 — Wen-Chi Hung and Hsin Chu; 132 (11), 1482-8 (2006).

Husain, Tahir
Evaluation of Drinking Water Treatment Technology: An Entropy-Based Fuzzy Application — Shakhawat Chowdhury and Tahir Husain; 132 (10), 1264-71 (2006).

Hwang, Sangchul
Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Hwang, Sz-Chwun John
Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Hymore, F. K.
Comparative Absorption of Crude Oil from Fresh and Marine Water Using Recycled Rubber — F. A. Aisien, F. K. Hymore, and R. O. Ebewele; 132 (9), 1078-81 (2006).

Ickes, Jennifer A.
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Irabien, Angel
Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Jácome, A.
Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).

Jain, Pradeep
Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).

Jayabalou, R.
Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Jennings, Aaron A.
Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Evaluating an Electrokinetically Driven Extraction Method for Measuring Heavy Metal Soil Contamination — Xiaolin Deng and Aaron A. Jennings; 132 (4), 527-37 (2006).

Jennings, Kristofer
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Jensen, Paul
Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Jeong, Sang-man
Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Jia, Yafei
Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields Jr., and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Jin, Shanshan
Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).

Johnson, Michelle L.
Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).

Jones, Sharon A.
Diversity in Environmental Engineering—Successes and Challenges — Alok Bhandari, Sharon A. Jones, Lee W. Clapp, Donna E. Fennell, and Timothy M. LaPara; 132 (7), 701-2 (2006).

Jung, Chang H.
Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).
Kaku, Vikram J.
Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).
Kambham, K.
Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).
Kang, Guyoung
Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).
Kantar, Cetin
Citric Acid Enhanced Remediation of Soils Contaminated with Uranium by Soil Flushing and Soil Washing — Cetin Kantar and Bruce D. Honeyman; 132 (2), 247-55 (2006).
Kapadia, Chirag
Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).
Karner, Dawn A.
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).
Kaul, S. N.
Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).
Kayhanian, Masoud
Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).
Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).
Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).
Keegan, Mike
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).
Kells, James A.
Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).
Kennedy, Matthew G.
Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).
Keshari, A. K.
Discussion of "Pollution Management in the Twentieth Century" by Neil S. Shifrin — A. K. Keshari and D. L. Parmar; 132 (11), 1543-6 (2006).
Khan, Sabbir
Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).
Khare, Pradnya
Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).
Khodadoust, Amid P.
Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).
Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).
Kim, Jae Young
Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).
Kim, Jeewoong
Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).
Kim, Kwang Soo
Microbial Adaptability to Organic Loading Changes in an Enhanced Biological Phosphorus Removal Process — Chang Hoon Ahn, Jae Kwang Park, and Kwang Soo Kim; 132 (8), 909-17 (2006).
Kim, Lee-Hyung
Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).
Kim, Young-Jin
Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).
Kirpich, Phillip Z.
Discussion of "Addressing Water Crisis in Developing Countries" by Harald D. Frederiksen — Phillip Z. Kirpich; 132 (6), 698 (2006).
Kish, Suzanne M.
Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).
Kjeldsen, Peter
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).
Koenig, Larry
Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).
Kohar, Eugene S.
Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).
Köngeter, Jürgen
Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).
Korkut, Eyüp Nafiz
Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).
Krick, William
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).
Krou, Jean F.
Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).
Ku, Young
Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).
Kumar, Pradeep
Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).
Biodegradation of Phenol with Wastewater as a Cosubstrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).
Kupferle, Margaret J.
Electrolytic Treatment of Azo Dye Wastewaters: Impact of Matrix Chloride Content — Margaret J. Kupferle, Ahmed Galal, and Paul L. Bishop; 132 (5), 514-8 (2006).
Kura, B.
Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Kwon, Seokjoon
Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292–300 (2006).

Lai, Han
Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).

Lai, Keith C. K.
Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).

La Motta, Enrique J.
The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Lange, Clifford R.
Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Lansey, Kevin E.
EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).
Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).

LaPara, Timothy M.
Diversity in Environmental Engineering—Successes and Challenges — Alok Bhandari, Sharon A. Jones, Lee W. Clapp, Donna E. Fennell, and Timothy M. LaPara; 132 (7), 701-2 (2006).

Larson, Steven L.
Remediation of RDX-Contaminated Water Using Alkaline Hydrolysis — Sangchul Hwang, Deborah R. Felt, Edward J. Bouwer, Michael C. Brooks, Steven L. Larson, and Jeffrey L. Davis; 132 (2), 256-62 (2006).

Lau, Sim-Lin
Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).
Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Lavania, Amit
Effect of Metallic Iron Concentration on End-Product Distribution during Metallic Iron-Assisted Autotrophic Denitrification — Amit Lavania and Purnendu Bose; 132 (9), 994-1000 (2006).

Lawrence, Gregory A.
Treatment of Acid Rock Drainage in a Meromictic Mine Pit Lake — Timothy S. R. Fisher and Gregory A. Lawrence; 132 (4), 515-26 (2006).

Lee, Duu-Jong
Charge Reversal Effect on Blanket in Full-Scale Floc Blanket Clarifier — Liang-Chuan Chen, Duu-Jong Lee, and Shan-Shan Chou; 132 (11), 1523-6 (2006).

Lee, K. W.
Analytic Solution on Critical Suspended Particle Size and Minimum Collection Efficiency in Deep Bed Filtration — Chang H. Jung and K. W. Lee; 132 (10), 1381-6 (2006).

Lee, Kenneth
Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Lee, Kwanghun
Simultaneous Removal of Cd and Cr(VI) Using Fe-Loaded Zeolite — Seunghak Lee, Kwanghun Lee, and Junboum Park; 132 (4), 445-50 (2006).

Lee, Seunghak
Simultaneous Removal of Cd and Cr(VI) Using Fe-Loaded Zeolite — Seunghak Lee, Kwanghun Lee, and Junboum Park; 132 (4), 445-50 (2006).

Lei, Li
Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).

Leshem, Ehud N.
Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).

Leštan, Domen
Advanced Oxidation for Treatment of Aqueous Extracts from EDTA Extraction of Pb and Zn Contaminated Soil — Neža Finžgar and Domen Leštan; 132 (10), 1376-80 (2006).

Letterman, Raymond D.
Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Leung, Susanna M.
Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Levantesi, Caterina
Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Levasseur, Béatrice
Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).

Li, Binwei
Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Li, Qian-Rong
Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Li, Yadong
TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Li, Yi
Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Li, Yingxia
Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).

Lien, C. Y.
Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Lin, Bin
Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock Jr., Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Lin, Chia-Huei
Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Lin, Chiou-Liang
Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Lin, Jin-Ping
Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Lin, Lian-Shin
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Lin, Mu-Xing
Ozonation of 2-Chlorophenol in Aqueous Solutions with a Packed Contactor — Young Ku, Mu-Xing Lin, and Hua-Wei Chen; 132 (12), 1670-2 (2006).

Lin, Yun-Huin
Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Linden, Karl G.
Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Ma-

mane and Karl G. Linden; 132 (6), 596-606 (2006).
Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).
Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).
Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Linker, Lewis C.

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Little, John C.

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).

Litwack, Howard S.

Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Liu, J. C.

Treatment of Polishing Wastewater from Semiconductor Manufacturer by Dispersed Air Flotation — C. Y. Lien and J. C. Liu; 132 (1), 51-7 (2006).

Liu, Yu

Errata for "Derivation of a General Adsorption Isotherm Model" by Y. Liu, H. Xu, and J. H. Tay — Yu Liu, Hui Xu, and Joo-Hwa Tay; 132 (1), 147 (2006).

Liu, Zhen-Shu

Control of PAHs from Incineration by Activated Carbon Fibers — Zhen-Shu Liu; 132 (5), 463-9 (2006).

Lo, Irene M. C.

Field Monitoring of a Permeable Reactive Barrier for Removal of Chlorinated Organics — Keith C. K. Lai, Irene M. C. Lo, Vibeke Birkelund, and Peter Kjeldsen; 132 (2), 199-210 (2006).
Selective Removal of Heavy Metals from Industrial Wastewater Using Maghemite Nanoparticle: Performance and Mechanisms — Jing Hu, Guohua Chen, and Irene M. C. Lo; 132 (7), 709-15 (2006).
EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Loh, Kai-Chee

Continuous Cometabolic Transformation of 4-Chlorophenol in the Presence of Phenol in a Hollow Fiber Membrane Bioreactor — Yi Li and Kai-Chee Loh; 132 (3), 309-14 (2006).

Lollar, Barbara Sherwood

Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

López, Isabel

Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Louarn, Essyllt

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Love, Nancy G.

Air/Water Oxygen Transfer in a Biological Aerated Filter — Susanna M. Leung, John C. Little, Troy Holst, and Nancy G. Love; 132 (2), 181-9 (2006).
Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper Jr., R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Lowe, Scott A.

Discussion of "*HSPF* Simulation of Runoff and Sediment Loads in the Upper Changjiang River Basin, China" by Seiji Hayashi, Shogo Murakami, Masataka Watanabe, and Xu Bao-Hua — Scott A. Lowe; 132 (1), 145-6 (2006).

Lowry, Gregory V.

Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Lui, Roger

Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).

Luketina, David

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Lyn, Dennis A.

Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Lyons, Terrence

Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Ma, Jun

Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).

Machdar, Izarul

Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar, Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Madhavan, Narain

Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).

Madrigal, José Andrés

The Role of Bioflocculation on Suspended Solids and Particulate COD Removal in the Trickling Filter Process — Joshua P. Boltz, Enrique J. La Motta, and José Andrés Madrigal; 132 (5), 506-13 (2006).

Magar, Victor S.

Parsing Ecological Impacts in Watersheds — Victor S. Magar, Richard J. Wenning, Charlie Menzie, and Sabine E. Apitz; 132 (1), 1-3 (2006).
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Mahmood, Talat

Activated Sludge Process Modification for Sludge Yield Reduction Using Pulp and Paper Wastewater — Talat Mahmood and Allan Elliott; 132 (9), 1019-27 (2006).

Majone, Mauro

Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).

Makinia, J.

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Mamane, Hadas

Impact of Particle Aggregated Microbes on UV Disinfection. I: Evaluation of Spore–Clay Aggregates and Suspended Spores — Hadas Mamane and Karl G. Linden; 132 (6), 596-606 (2006).
Impact of Particle Aggregated Microbes on UV Disinfection. II: Proper Absorbance Measurement for UV Fluence — Hadas Mamane and Karl G. Linden; 132 (6), 607-15 (2006).
Comparative Inactivation of *Bacillus Subtilis* Spores and MS-2 Coliphage in a UV Reactor: Implications for Validation — Zuzana Bohrerova, Hadas Mamane, Joel J. Ducoste, and Karl G. Linden; 132 (12), 1554-61 (2006).

Mamedov, B. A.

Evaluation of Oxygen Sag Equation for Second-Order Biochemical Oxygen Demand Decay — B. A. Mamedov; 132 (12), 1606-8 (2006).

Manariotis, Ioannis D.

Anaerobic Filter Treatment of Municipal Wastewater: Biosolids Behavior — Ioannis D. Manariotis and Sotirios G. Grigoropoulos; 132 (1), 23-31 (2006).

Mara, D. Duncan
Aerated Rock Filters for Enhanced Ammonia and Fecal Coliform Removal from Facultative Pond Effluents — D. Duncan Mara and Michelle L. Johnson; 132 (4), 574-7 (2006).
Marcy, Ken
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).
Mariño, Miguel A.
Improved Compartmental Modeling and Application to Three-Phase Contaminant Transport in Unsaturated Porous Media — Xuefeng Chu and Miguel A. Mariño; 132 (2), 211-9 (2006).
Marquette, Andre
Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).
Martin, Joseph P.
Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).
Massoudieh, Arash
Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).
Matsumoto, Mark R.
Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).
Maurya, Nityanand Singh
Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).
McCue, Terrence Michael
Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).
McDonough, Kathleen M.
Microcosm Approach to Study Transport of Polychlorinated Biphenyls in Sediment — Kathleen M. McDonough and David A. Dzombak; 132 (6), 689-93 (2006).
McGuire, Travis M.
Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab Jr.; 132 (6), 653-63 (2006).
McKay, Alan
Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).
McLeod, Shaun M.
Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).
McMahon, Katherine D.
Prions: Novel Pathogens of Environmental Concern? — Joel A. Pedersen, Katherine D. McMahon, and Craig H. Benson; 132 (9), 967-9 (2006).
McNab, Walt W., Jr.
Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab Jr.; 132 (6), 653-63 (2006).
McNeill, Laurie S.
Chromium Redox Chemistry in Drinking Water Systems — Han Lai and Laurie S. McNeill; 132 (8), 842-51 (2006).
Medina, Martín
Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).
Meeroff, Daniel E.
Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).
Mehrotra, Indu
Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).
Biodegradation of Phenol with Wastewater as a Co-substrate in Upflow Anaerobic Sludge Blanket — Veeresh S. Gali, Pradeep Kumar, and Indu Mehrotra; 132 (11), 1539-42 (2006).
Menzie, Charlie
Parsing Ecological Impacts in Watersheds — Victor S. Magar, Richard J. Wenning, Charlie Menzie, and Sabine E. Apitz; 132 (1), 1-3 (2006).
Mercier, Guy
Metals Removal from Municipal Waste Incinerator Fly Ashes and Reuse of Treated Leachates — Béatrice Levasseur, Myriam Chartier, Jean-François Blais, and Guy Mercier; 132 (5), 497-505 (2006).
Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).
Meunier, Nathalie
Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).
Miller, Christopher M.
Iron Oxide Enhanced Chlorine Decay and Disinfection By-Product Formation — Kazi Z. A. Hassan, Kevin C. Bower, and Christopher M. Miller; 132 (12), 1609-16 (2006).
Miller, Jennifer H.
EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).
Nitrogen Transformations during Soil–Aquifer Treatment of Wastewater Effluent—Oxygen Effects in Field Studies — Jennifer H. Miller, Wendell P. Ela, Kevin E. Lansey, Peter L. Chipello, and Robert G. Arnold; 132 (10), 1298-306 (2006).
Mittal, Atul Kumar
Applicability of Equilibrium Isotherm Models for the Biosorptive Uptakes in Comparison to Activated Carbon-Based Adsorption — Nityanand Singh Maurya and Atul Kumar Mittal; 132 (12), 1589-99 (2006).
Mofidi, Alexander A.
Polychromatic UV Fluence Measurement Using Chemical Actinometry, Biodosimetry, and Mathematical Techniques — Shanshan Jin, Alexander A. Mofidi, and Karl G. Linden; 132 (8), 831-41 (2006).
Mohan, Prasanna K.
Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).
Molina, J.
Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).
Möller, Gregory
Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).
Montalto, Franco A.
Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).
Montané, Camille
Heavy Metals Removal from Acidic and Saline Soil Leachate Using Either Electrochemical Coagulation or Chemical Precipitation — Nathalie Meunier, Patrick Drogui, Camille Montané, Robert Hausler, Jean-François Blais, and Guy Mercier; 132 (5), 545-54 (2006).
Moon, Hee Sun
Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).
Morley, Matthew
Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).
Morse, Timothy M.
Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).
Murphy, Paul
Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).

Myers, Tommy
Evaluation of Contaminant Resuspension Potential during Cap Placement at Two Dissimilar Sites — Terrence Lyons, Jennifer A. Ickes, Victor S. Magar, Carl S. Albro, Lydia Cumming, Brenda Bachman, Thomas Fredette, Tommy Myers, Mike Keegan, Ken Marcy, and Olga Guza; 132 (4), 505-14 (2006).

Najarian, Tavit O.
Development of a Simple Phosphorus Model for a Large Urban Watershed: A Case Study — Howard S. Litwack, Joseph L. DiLorenzo, Poshu Huang, and Tavit O. Najarian; 132 (4), 538-46 (2006).

Nakhla, George
Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).
Operational Optimization and Mass Balances in a Two-Stage MBR Treating High Strength Pet Food Wastewater — C. Acharya, G. Nakhla, and A. Bassi; 132 (7), 810-7 (2006).

Nam, Kyoungphile
Initial Alkalinity Requirement and Effect of Alkalinity Sources in Sulfur-Based Autotrophic Denitrification Barrier System — Hee Sun Moon, Kyoungphile Nam, and Jae Young Kim; 132 (9), 971-5 (2006).

Narla, Omprasad
Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).

Natrajan, Priya
Feasibility of Using Natural Zeolites to Remove Sodium from Coal Bed Methane-Produced Water — Frank Y. C. Huang and Priya Natrajan; 132 (12), 1644-50 (2006).

Naunovic, Zorana
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Newcombe, Remembrance L.
Arsenic Removal from Water by Moving Bed Active Filtration — Remembrance L. Newcombe, Brian K. Hart, and Gregory Möller; 132 (1), 5-12 (2006).

Newell, Charles J.
Multiyear Temporal Changes in Chlorinated Solvent Concentrations at 23 Monitored Natural Attenuation Sites — Charles J. Newell, Iain Cowie, Travis M. McGuire, and Walt W. McNab Jr.; 132 (6), 653-63 (2006).

Newman, J. A.
New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Ngeh, Lawrence N.
Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Nikolov, Alex
Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Noble, Rachel T.
Attachment of Fecal Indicator Bacteria to Particles in the Neuse River Estuary, N.C. — J. Stephen Fries, Gregory W. Characklis, and Rachel T. Noble; 132 (10), 1338-45 (2006).

Noguera, Daniel R.
Evaluation of Sludge Yield and Phosphorus Removal in a Cannibal Solids Reduction Process — Ramesh K. Goel and Daniel R. Noguera; 132 (10), 1331-7 (2006).

Ohashi, Akiyoshi
Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar, Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).

Oktay, Seda
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Oleszkiewicz, J. A.
Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Olmo, Iñaki Fernández
Mechanical Properties and Environmental Assessment of Mortars Containing Metallic Oxides — Isabel López, Iñaki Fernández Olmo, and Angel Irabien; 132 (8), 949-55 (2006).

Oostrom, M.
Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Orbell, John D.
Achievement of 100% Removal of Oil from Feathers Employing Magnetic Particle Technology — Hien V. Dao, Lawrence N. Ngeh, Stephen W. Bigger, and John D. Orbell; 132 (5), 555-9 (2006).

Orhon, Derin
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Ostendorf, David W.
Calibrated Models of Deicing Agent Solids, Pavement Texture, and Specific Conductivity of Highway Runoff — David W. Ostendorf, Erich S. Hinlein, David P. Ahlfeld, and Jason T. DeJong; 132 (12), 1562-71 (2006).

Overcamp, Thomas J.
Type II Settling Data Analysis — Thomas J. Overcamp; 132 (1), 137-9 (2006).

Pacheco, Sadott
Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).

Pai, Tzu-Yi
Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Pardue, John H.
Toxic and Contaminant Concerns Generated by Hurricane Katrina — Danny D. Reible, Charles N. Haas, John H. Pardue, and William J. Walsh; 132 (6), 565-6 (2006).

Park, Heekyung
Uncertainty Analysis of Mound Monitoring for Recharged Water from Surface Spreading Basins — Heekyung Park, Dong-Hoon Cha, and Peter Fox; 132 (12), 1572-9 (2006).

Park, Jae Kwang
Microbial Adaptability to Organic Loading Changes in an Enhanced Biological Phosphorus Removal Process — Chang Hoon Ahn, Jae Kwang Park, and Kwang Soo Kim; 132 (8), 909-17 (2006).

Park, Junboum
Simultaneous Removal of Cd and Cr(VI) Using Fe-Loaded Zeolite — Seunghak Lee, Kwanghun Lee, and Junboum Park; 132 (4), 445-50 (2006).

Park, Sung-Kil
Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Parker, Andrew
Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Parker, D. S.
New Process Design Procedure for Dealing with Variable Trickling Filter Effluent Suspended Solids — D. S. Parker and J. A. Newman; 132 (7), 758-63 (2006).

Parks, Jeffrey L.
Precipitative Removal of As, Ba, B, Cr, Sr, and V Using Sodium Carbonate — Jeffrey L. Parks and Marc Edwards; 132 (5), 489-96 (2006).

Parmar, D. L.
Discussion of "Pollution Management in the Twentieth Century" by Neil S. Shifrin — A. K. Keshari and D. L. Parmar; 132 (11), 1543-6 (2006).

Pedersen, Joel A.
Prions: Novel Pathogens of Environmental Concern? — Joel A. Pedersen, Katherine D. McMahon, and Craig H. Benson; 132 (9), 967-9 (2006).

Peng, Zan-Guo
Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Peot, Christopher
Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Peters, Robert W.
Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).
Petersen, Elijah J.
Screening Level Risk Assessment of Heavy Metal Contamination in Cleveland Area Commons — Elijah J. Petersen, Aaron A. Jennings, and Jun Ma; 132 (3), 392-404 (2006).
Petersen, James N.
Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).
Peyton, Brent M.
Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).
Pines, David S.
Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).
Pirnie, Erica F.
Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).
Pivonka, P.
Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).
Porter, Andrea
Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).
Powell, Jon
Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).
Powelson, David
Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).
Prasertmanukitch, S.
Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).
Prashanth, S.
Anaerobic Degradability: Effect of Particulate COD — S. Prashanth, Pradeep Kumar, and Indu Mehrotra; 132 (4), 488-96 (2006).
Pré, Pascaline
Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).
Prendergast, John
Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).
Putz, Gordon J.
Urban Runoff Quality Characterization and Load Estimation in Saskatoon, Canada — Shaun M. McLeod, James A. Kells, and Gordon J. Putz; 132 (11), 1470-81 (2006).
Pyzocha, Michael J.
Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).
Qi, Shuang
PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).
Qian, Yi
Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).
Quanrud, David M.
Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).
Quershi, Zafar H.
Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).
Quiñones-Bolaños, Edgar
Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).
Rabideau, Alan J.
Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).
Ragheb, Katherine
Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).
Ramirez, Mark
Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).
Randall, Andrew Amis
Contrasting the Benefits of Primary Clarification versus Prefermentation in Activated Sludge Biological Nutrient Removal Systems — Terrence Michael McCue, Andrew Amis Randall, and F. Gulen Eremektar; 132 (9), 1061-7 (2006).
Randall, Clifford
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).
Randolph, John
Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).
Rao, N. N.
Fenton and Electro-Fenton Methods for Oxidation of H-Acid and Reactive Black 5 — N. N. Rao, Gaurav Bose, Pradnya Khare, and S. N. Kaul; 132 (3), 367-76 (2006).
Rastas, Lea
Methodological Aspects of Using Blast Furnace Slag for Wastewater Phosphorus Removal — Annelie Hedström and Lea Rastas; 132 (11), 1431-8 (2006).
Rathfelder, Klaus
Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations— Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).
Reckhow, David A.
Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).
Electrochemical Oxidation and Ozonation for Textile Wastewater Reuse — Ehud N. Leshem, David S. Pines, Sarina J. Ergas, and David A. Reckhow; 132 (3), 324-30 (2006).
Reddy, Krishna R.
Cyclodextrin-Enhanced Electrokinetic Remediation of Soils Contaminated with 2,4-Dinitrotoluene — Amid P. Khodadoust, Krishna R. Reddy, and Omprasad Narla; 132 (9), 1043-50 (2006).
Reible, Danny D.
Toxic and Contaminant Concerns Generated by Hurricane Katrina — Danny D. Reible, Charles N. Haas, John H. Pardue, and William J. Walsh; 132 (6), 565-6 (2006).
Predicting the Performance of Activated Carbon-, Coke-, and Soil-Amended Thin Layer Sediment Caps — Paul Murphy, Andre Marquette, Danny Reible, and Gregory V. Lowry; 132 (7), 787-94 (2006).
Reinhard, Martin
EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).
Reinhart, Debra R.
Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).
Reinosdotter, Karin
Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).
Ribes, J.
Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).
Rice, Robert W.
Design Factors Affecting the Flow of Water

through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Richardson, C. P.

Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).

Richardson, Jay B.

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Rifai, Hanadi S.

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Rinaldi, Víctor A.

Removal of Immiscible Contaminants from Sandy Soils Monitored by Means of Dielectric Measurements — Víctor A. Rinaldi and Franco M. Francisca; 132 (8), 931-9 (2006).

Rizzo, Donna M.

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Robinson, J. Paul

Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Robinson, R. Bruce

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Roby, J. Chadwick

Concentration–Duration–Frequency Curves for pH in a Stream in the Great Smoky Mountains — R. Bruce Robinson and J. Chadwick Roby; 132 (12), 1600-5 (2006).

Rockne, Karl J.

Nutrient Removal in a Cold-Region Wastewater Stabilization Pond: Importance of Ammonia Volatilization — Karl J. Rockne and Patrick L. Brezonik; 132 (4), 451-9 (2006).

Rodgers, Michael

Novel Hybrid Filter for the Treatment of Septic Tank Effluent — Michael Rodgers, Mark Gerard Healy, and John Prendergast; 132 (7), 764-8 (2006).

Rosenwinkel, K.-H.

Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Rossman, Anthony J.

Low-Temperature Soil Heating Using Renewable Energy — Anthony J. Rossman, Nancy J. Hayden, and Donna M. Rizzo; 132 (5), 537-44 (2006).

Rouaud, Olivier

Behavior of an Air Curtain Subjected to Transversal Pressure Variations — Olivier Rouaud and Michel Havet; 132 (2), 263-70 (2006).

Rousseau, Aymeric

Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Rubin, Hillel

Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Sadek, Adel

Fuzzy Geographic Information Systems for Phytoremediation Plant Selection — Andrea Porter, Adel Sadek, and Nancy Hayden; 132 (1), 120-8 (2006).

Safferman, Steve

Experimental Data and Theoretical Analysis of Particle Removal Efficiency in a Novel Hydraulic Separation Unit — Jean F. Krou, James F. Fox, and Steve Safferman; 132 (10), 1307-13 (2006).

Sahle-Demessie, Endalkachew

The Challenges of Air Pollution and Residual Risk Assessment — Endalkachew Sahle-Demessie; 132 (5), 431-2 (2006).

Sahoo, Goloka Behari

Response of a Tropical Reservoir to Bubbler Destratification — Goloka Behari Sahoo and David Luketina; 132 (7), 736-46 (2006).

Sanford, Robert A.

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Sangameswaran, S.

Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Sarnecki, Kathryn L.

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Sato, Chikashi

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Sayles, Gregory D.

PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).

Scardina, Paolo

Fundamentals of Bubble Formation during Coagulation and Sedimentation Processes — Paolo Scardina and Marc Edwards; 132 (6), 575-85 (2006).

Schaad, David E.

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Schimek, Jennifer

Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).

Schleiss, Anton J.

Circulation in Stratified Lakes due to Flood-Induced Turbidity Currents — Giovanni De Cesare, Jean-Louis Boillat, and Anton J. Schleiss; 132 (11), 1508-17 (2006).

Schlosser, Peter

Comparison of SF_6 and Fluorescein as Tracers for Measuring Transport Processes in a Large Tidal River — David T. Ho, Peter Schlosser, Robert W. Houghton, and Ted Caplow; 132 (12), 1664-9 (2006).

Schmidt, David P.

Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).

Sears, K.

Density and Activity Characterization of Activated Sludge Flocs — K. Sears, J. E. Alleman, J. L. Barnard, and J. A. Oleszkiewicz; 132 (10), 1235-42 (2006).

Seco, A.

Simple Rule-Based Algorithm for Optimizing Volatile Fatty Acids Production in Primary Sludge Fermentation Schemes — J. Chanona, J. Ribes, A. Seco, and J. Ferrer; 132 (11), 1439-46 (2006).

Semmens, Michael

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Seth, Indranil

Use of GIS in Urban Storm-Water Modeling — Indranil Seth, Puripus Soonthornnonda, and Erik R. Christensen; 132 (12), 1550-2 (2006).

Shahriari, H.

Simulating Activated Sludge System by Simple-to-Advanced Models — H. Shahriari, C. Eskicioglu, and R. L. Droste; 132 (1), 42-50 (2006).

Shang, Chii

MS2 Inactivation by Chloride-Assisted Electrochemical Disinfection — Qian Fang, Chii Shang, and Guohua Chen; 132 (1), 13-22 (2006).

Sharma, Anil Kumar

Zirconia-Supported Copper Oxide—A Catalyst for Removal of Vehicular Exhaust Gas Pollutants — Anil Kumar Sharma; 132 (8), 956-9 (2006).

Shawn Matott, L.

Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Shen, Chengyue

Dyed Microspheres for Quantification of UV Dose Distributions: Photochemical Reactor Characterization by Lagrangian Actinometry — Ernest R. Blatchley, III, Chengyue Shen, Zorana Naunovic, Lian-Shin Lin, Dennis A. Lyn, J. Paul Robinson, Katherine Ragheb, Gérald Grégori, Donald E. Bergstrom, Shiyue Fang, Yousheng Guan, Kristofer Jennings, and Nilupa Gunaratna; 132 (11), 1390-403 (2006).

Sherif, Ahmed H.
Model for Environmental Risk Assessment of Tourism Project Construction on the Egyptian Red Sea Coast — Ahmed H. El Sherbiny, Ahmed H. Sherif, and Ali N. Hassan; 132 (10), 1272-81 (2006).

Shibata, Tomoyuki
Iron-Mediated Aeration: Evaluation of Energy-Assisted Enhancement for In Situ Subsurface Remediation — Daniel E. Meeroff, James D. Englehardt, Luis. A. Echegoyen, and Tomoyuki Shibata; 132 (7), 747-57 (2006).

Shields, F. Douglas, Jr.
Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields Jr., and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Shifrin, Neil S.
Closure to "Pollution Management in the Twentieth Century" by Neil S. Shifrin — Neil S. Shifrin; 132 (11), 1546 (2006).

Shih, Pai-Haung
Emission of Polycyclic Aromatic Hydrocarbons on the Combustion of Liquid Crystal Display Components — Yi-Chi Chien and Pai-Haung Shih; 132 (9), 1028-33 (2006).

Shimotori, Tsutomu
High-Density Polyethylene Membrane Containing Fe^0 as a Contaminant Barrier — Tsutomu Shimotori, Edward L. Cussler, and William A. Arnold; 132 (7), 803-9 (2006).

Shoemaker, Leslie
Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Shrivastava, R. K.
Uncertainty Analysis of Conventional Water Treatment Plant Design for Suspended Solids Removal — Ajay Kumar Gupta and R. K. Shrivastava; 132 (11), 1413-21 (2006).

Silvadasan, X.
Total PM Emission Factors for Steel Grit Used in Dry Abrasive Blasting — B. Kura, S. Sangameswaran, K. Kambham, and X. Silvadasan; 132 (12), 1617-25 (2006).

Simon, Michelle A.
Method for Measuring Air-Immiscible Liquid Partition Coefficients — Michelle A. Simon and Mark L. Brusseau; 132 (1), 140-4 (2006).

Singh, Kripa Shankar
Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).
Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Singh, Sushil K.
Closure to "Master Diagnostic Curve for Dispersion Coefficient of Soils" by Sushil K. Singh — Sushil K. Singh; 132 (9), 1083-4 (2006).

Sisiopiku, Virginia P.
Technology Evaluation of Hydrogen Light-Duty Vehicles — Virginia P. Sisiopiku, Aymeric Rousseau, Fouad H. Fouad, and Robert W. Peters; 132 (6), 568-74 (2006).

Sivacoumar, R.
Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).

Sleep, Brent E.
Isotopic Fractionation of Tetrachloroethene Undergoing Biodegradation Supported by Endogenous Decay — Sandra C. Béranger, Brent E. Sleep, Barbara Sherwood Lollar, and Andrea J. Brown; 132 (7), 725-35 (2006).

Smith, D. W.
Modeling the Sorption of Fluoride onto Alumina — H. R. Fletcher, D. W. Smith, and P. Pivonka; 132 (2), 229-46 (2006).

Smith, James A.
Optimal Design of a Compacted Soil Liner Containing Sorptive Amendments — Shannon L. Bartelt-Hunt, Teresa B. Culver, James A. Smith, L. Shawn Matott, and Alan J. Rabideau; 132 (7), 769-76 (2006).

Smith, Stephen R.
Deterministic-Based Model of Slow Sand Filtration. I: Model Development — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 872-86 (2006).
Deterministic-Based Model of Slow Sand Filtration. II: Model Application — Luiza C. Campos, Stephen R. Smith, and Nigel J. D. Graham; 132 (8), 887-94 (2006).

Smith, Winter
Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Snow, Daniel
Evaluating Ozone as a Remedial Treatment for Removing RDX from Unsaturated Soils — Michael Adam, Steve Comfort, Daniel Snow, David Cassada, Matthew Morley, and Wilson Clayton; 132 (12), 1580-8 (2006).

Song, Inhong
Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Soonthornnonda, Puripus
Use of GIS in Urban Storm-Water Modeling — Indranil Seth, Puripus Soonthornnonda, and Erik R. Christensen; 132 (12), 1550-2 (2006).

Spengler, Steven
Use of Boron as a Tracer for Recycled Water in Brackish Aquifers — Roger Babcock Jr., Bin Lin, and Steven Spengler; 132 (8), 862-71 (2006).

Spering, V.
Comparison of Two Model Concepts for Simulation of Nitrogen Removal at a Full-Scale Biological Nutrient Removal Pilot Plant — J. Makinia, K.-H. Rosenwinkel, and V. Spering; 132 (4), 476-87 (2006).

Spiller, Martin
Enhancement of Remediation of NAPL Contaminated Fractured Permeable Formations—Modeling Study — Hillel Rubin, Klaus Rathfelder, Martin Spiller, and Jürgen Köngeter; 132 (1), 58-67 (2006).

Sriram, Anant
Dissolution of Wollastonite in a Packed Bed Contactor — Gunwant Singh Anand, Anant Sriram, and Raymond D. Letterman; 132 (4), 460-7 (2006).

Srivastava, Rajesh
Discussion of "Master Diagnostic Curve for Dispersion Coefficient of Soils" by Sushil K. Singh — Rajesh Srivastava; 132 (9), 1082-3 (2006).

Standridge, Jon H.
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Steenhuis, Tammo S.
Hydrological Evaluation of Septic Disposal Field Design in Sloping Terrains — Amy S. Collick, Zachary M. Easton, Franco A. Montalto, Bin Gao, Young-Jin Kim, Laurence Day, and Tammo S. Steenhuis; 132 (10), 1289-97 (2006).

Stenstrom, Michael K.
Oil and Grease Measurement in Highway Runoff—Sampling Time and Event Mean Concentrations — Sabbir Khan, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (3), 415-22 (2006).
Dynamic Characteristics of Particle Size Distribution in Highway Runoff: Implications for Settling Tank Design — Yingxia Li, Sim-Lin Lau, Masoud Kayhanian, and Michael K. Stenstrom; 132 (8), 852-61 (2006).
Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Stern, Jennifer
Characterization of Methane Flux and Oxidation at a Solid Waste Landfill — Tarek Abichou, David Powelson, Jeffery Chanton, Sharon Escoriaza, and Jennifer Stern; 132 (2), 220-8 (2006).

Stevens, David K.
Treating Soil PCP at Optimal Conditions Using Heme and Peroxide — Shyi-Tien Chen, David K. Stevens, Guyoung Kang, and M.-J. Hsieh; 132 (7), 704-8 (2006).

Stine, Scott W.
Comparison of Crop Contamination by Microorganisms during Subsurface Drip and Furrow Irrigation — Inhong Song, Scott W. Stine, Christopher Y. Choi, and Charles P. Gerba; 132 (10), 1243-8 (2006).

Stone, Michael
Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Stroup-Gardiner, Mary
Commercial Odor-Reducing Agents for Minimizing the Odor Potential of Asphalt Binders — Clifford R. Lange, Mary Stroup-Gardiner, and Winter Smith; 132 (4), 567-73 (2006).

Stuckey, David C.
Treatment of Dilute Wastewaters Using a Novel Submerged Anaerobic Membrane Bioreactor — Alan Y. Hu and David C. Stuckey; 132 (2), 190-8 (2006).

Su, Chengyi
Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).
Suárez, J.
Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).
Suarez, Monica P.
Dioxin in Storm-Water Runoff in Houston, Texas — Monica P. Suarez, Hanadi S. Rifai, Jennifer Schimek, Michael Bloom, Paul Jensen, and Larry Koenig; 132 (12), 1633-43 (2006).
Suidan, Makram T.
PCB Volatilization from Sediments — Shuang Qi, Cristina Alonso, Makram T. Suidan, and Gregory D. Sayles; 132 (1), 102-11 (2006).
Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).
Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).
Enhancement of Anaerobic Digestion of Excess Municipal Sludge with Thermal and/or Oxidative Treatment — Jesús A. Cacho Rivero, Narain Madhavan, Makram T. Suidan, Philippe Ginestet, and Jean-Marc Audic; 132 (6), 638-44 (2006).
Swarnalatha, S.
Particulate Matter from Stone Crushing Industry: Size Distribution and Health Effects — R. Sivacoumar, R. Jayabalou, S. Swarnalatha, and K. Balakrishnan; 132 (3), 405-14 (2006).
Tabak, Henry H.
Bioavailability Prediction of Polycyclic Aromatic Hydrocarbons in Field-Contaminated Sediment by Mild Extractions — Li Lei, Rajesh Bagchi, Amid P. Khodadoust, Makram T. Suidan, and Henry H. Tabak; 132 (3), 384-91 (2006).
Tai, C. S.
Combined Removal of Carbon and Nitrogen in an Integrated UASB-Jet Loop Reactor Bioreactor System — C. S. Tai, K. S. Singh, and S. R. Grant; 132 (6), 624-37 (2006).
Talley, Jeffrey W.
Transformation of DDT and Its Metabolites by Various Abiotic Methods — Erica F. Pirnie, Jeffrey W. Talley, and Lakhwinder S. Hundal; 132 (5), 560-4 (2006).
Tandoi, Valter
Modeling Substrate Interactions during Aerobic Biodegradation of Mixtures of Vinyl Chloride and Ethene — Essyllt Louarn, Federico Aulenta, Caterina Levantesi, Mauro Majone, and Valter Tandoi; 132 (8), 940-8 (2006).
Tandukar, Madan
Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar, Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).
Tang, Hongxiao
Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).
Tapia, Josefina
Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).
Tas, Didem Okutman
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).
Tay, Joo-Hwa
Errata for "Derivation of a General Adsorption Isotherm Model" by Y. Liu, H. Xu, and J. H. Tay — Yu Liu, Hui Xu, and Joo-Hwa Tay; 132 (1), 147 (2006).
Tejero, I.
Simultaneous Removal of Organic Matter and Nitrogen Compounds in Autoaerated Biofilms — A. Jácome, J. Molina, J. Suárez, and I. Tejero; 132 (10), 1255-63 (2006).
Therriault, Brian M.
Evaluation of Water Reuse Technologies for the Textile Industry — Sarina J. Ergas, Brian M. Therriault, and David A. Reckhow; 132 (3), 315-23 (2006).
Thompson, Robert W.
Vapor Leak Detection for an Underground Storage Tank System — Michael J. Pyzocha, Roger Lui, and Robert W. Thompson; 132 (8), 926-30 (2006).
Thornton, E. C.
Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).
Thuman, Andrew J.
Jackson River Modeling: 50-Year Perspective — Andrew J. Thuman, Thomas W. Gallagher, and Timothy M. Morse; 132 (9), 1051-60 (2006).
Tierney, M. J.
Removal of Toluene Vapor with Dispersed Activated Carbon — M. J. Tierney, S. Prasertmanukitch, and S. Heslop; 132 (3), 350-7 (2006).
Tikalsky, Paul
Metallic Characterization of Foundry By-Products per Waste Streams and Leaching Protocols — An Deng and Paul Tikalsky; 132 (6), 586-95 (2006).
Ting, Wen-Huei
Enhancement of Denitrification in Upflow Sludge Bed Reactors with Sludge Wasting — Wen-Huei Ting and Ju-Sheng Huang; 132 (4), 468-75 (2006).
Tobiason, John E.
Three-Dimensional Modeling for Estimation of Hydraulic Retention Time in a Reservoir — Matthew G. Kennedy, David P. Ahlfeld, David P. Schmidt, and John E. Tobiason; 132 (9), 976-84 (2006).
Townsend, Timothy G.
Estimating the Hydraulic Conductivity of Landfilled Municipal Solid Waste Using the Borehole Permeameter Test — Pradeep Jain, Jon Powell, Timothy G. Townsend, and Debra R. Reinhart; 132 (6), 645-52 (2006).
Tripp, G. A.
Investigation of Boundary Shear Stress and Pollutant Detachment from Impervious Surface during Simulated Urban Storm Runoff — C. P. Richardson and G. A. Tripp; 132 (1), 85-92 (2006).
Tsai, Yung-Pin
Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).
Tummala, Archana
Procedure to Quantify Biofilm Activity on Carriers Used in Wastewater Treatment Systems — James Bolton, Archana Tummala, Chirag Kapadia, Manoj Dandamudi, and Joanne M. Belovich; 132 (11), 1422-30 (2006).
Uemura, Shigeki
Potential of a Combination of UASB and DHS Reactor as a Novel Sewage Treatment System for Developing Countries: Long-Term Evaluation — Madan Tandukar, Izarul Machdar, Shigeki Uemura, Akiyoshi Ohashi, and Hideki Harada; 132 (2), 166-72 (2006).
Urano, Kohei
Determination and Correlation of Binary Gas Adsorption Equilibria of VOCs — Shuji Himeno and Kohei Urano; 132 (3), 301-8 (2006).
Vairavamoorthy, K.
Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).
Valencia, Félix
Removal of Inorganic Mercury from Polluted Water Using Structured Nanoparticles — Sadott Pacheco, Martín Medina, Félix Valencia, and Josefina Tapia; 132 (3), 342-9 (2006).
van Loosdrecht, Mark C. M.
Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).
Formation of Aerobic Granules with Domestic Sewage — Merle K. de Kreuk and Mark C. M. van Loosdrecht; 132 (6), 694-7 (2006).
Venosa, Albert D.
Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).
Evaluation of Mixing Energy in Laboratory Flasks Used for Dispersant Effectiveness Testing — Vikram J. Kaku, Michel C. Boufadel, and Albert D. Venosa; 132 (1), 93-101 (2006).
Tracer Studies in Laboratory Beach Simulating Tidal Influences — Michel C. Boufadel, Makram T. Suidan, and Albert D. Venosa; 132 (6), 616-23 (2006).
Vidic, Radisav D.
Sulfur Impregnation on Activated Carbon Fibers through H_2S Oxidation for Vapor Phase Mercury Removal — Wenguo Feng, Seokjoon Kwon, Xue Feng, Eric Borguet, and Radisav D. Vidic; 132 (3), 292-300 (2006).
Vijayaraghavan, Krishna
Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Ni-

kolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Viklander, Maria

Handling of Urban Snow with Regard to Snow Quality — Karin Reinosdotter and Maria Viklander; 132 (2), 271-8 (2006).

Vilalai, Sirapong

Statistical Modeling to Forecast Odor Levels of Biosolids Applied to Reuse Sites — Steven A. Gabriel, Sirapong Vilalai, Christopher Peot, and Mark Ramirez; 132 (5), 479-88 (2006).

Vipulanandan, C.

Removal of Lead from Contaminated Water and Clay Soil Using a Biosurfactant — Jeewoong Kim and C. Vipulanandan; 132 (7), 777-86 (2006).

Viraraghavan, Thiruvenkatachari

Sludge Blanket Height and Flow Pattern in UASB Reactors: Temperature Effects — Kripa Shankar Singh, Thiruvenkatachari Viraraghavan, and Debraj Bhattacharyya; 132 (8), 895-900 (2006).

Voice, Thomas C.

Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, II, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Walker, Aaron K.

TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Walker, Harold W.

Lime-Soda Softening Process Modifications for Enhanced NOM Removal — Mustafa Bob and Harold W. Walker; 132 (2), 158-65 (2006).

Walsh, William J.

Toxic and Contaminant Concerns Generated by Hurricane Katrina — Danny D. Reible, Charles N. Haas, John H. Pardue, and William J. Walsh; 132 (6), 565-6 (2006).

Walton, John C.

Design Factors Affecting the Flow of Water through Below-Ground Concrete Vaults — Robert W. Rice and John C. Walton; 132 (10), 1346-54 (2006).

Wang, Dongsheng

Quantitative Model of Coagulation with Inorganic Polymer Flocculant PACl: Application of the PCNM — Dongsheng Wang and Hongxiao Tang; 132 (5), 434-41 (2006).

Wang, Ping

Surface Analysis of Chesapeake Bay Water Quality Response to Different Nutrient and Sediment Loads — Ping Wang, Lewis C. Linker, Richard Batiuk, and Carl Cerco; 132 (3), 377-83 (2006).

Estimation of Diffusion Coefficients and Solubilities for Organic Solvents Permeation through High-Density Polyethylene Geomembrane — Keh-Ping Chao, Ping Wang, and Chia-Huei Lin; 132 (5), 519-26 (2006).

Wang, Sam S. Y.

Development and Application of a Phosphorus Model for a Shallow Oxbow Lake — Xiaobo Chao, Yafei Jia, Charles M. Cooper, F. Douglas Shields Jr., and Sam S. Y. Wang; 132 (11), 1498-507 (2006).

Warwick, John J.

Long-Term Dynamic Modeling Approach to Quantifying Attached Algal Growth and Associated Impacts on Dissolved Oxygen in the Lower Truckee River, Nevada — Suzanne M. Kish, Justin Bartlett, John J. Warwick, Alan McKay, and Chris Fritsen; 132 (10), 1366-75 (2006).

Wasan, Darsh

Radioactive Waste Foams: Formation and Mitigation — Krishna Vijayaraghavan, Alex Nikolov, Darsh Wasan, Bond Calloway Jr., Mark L. Crowder, Michael Stone, and Zafar H. Quershi; 132 (7), 716-24 (2006).

Weiss, Jeffrey D.

Storm Water Detention Ponds: Modeling Heavy Metal Removal by Plant Species and Sediments — Jeffrey D. Weiss, Miki Hondzo, and Michael Semmens; 132 (9), 1034-42 (2006).

Wenning, Richard J.

Parsing Ecological Impacts in Watersheds — Victor S. Magar, Richard J. Wenning, Charlie Menzie, and Sabine E. Apitz; 132 (1), 1-3 (2006).

Werth, Charles J.

Biodegradation of Tetrachloroethene by Chitin Fermentation Products in a Continuous Flow Column System — Rachel A. Brennan, Robert A. Sanford, and Charles J. Werth; 132 (6), 664-73 (2006).

Westerhoff, Paul K.

Character of Organic Matter in Soil-Aquifer Treatment Systems — Jörg E. Drewes, David M. Quanrud, Gary L. Amy, and Paul K. Westerhoff; 132 (11), 1447-58 (2006).

Westrick, Judy

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Wey, Ming-Yen

Effect of Pressure Fluctuations on the Quality of Fluidization and on the Generation of Particulate Matters during Incineration — Chiou-Liang Lin, Ming-Yen Wey, and Han-Tsung Cheng; 132 (8), 960-6 (2006).

Wilsenach, Jac A.

Integration of Processes to Treat Wastewater and Source-Separated Urine — Jac A. Wilsenach and Mark C. M. van Loosdrecht; 132 (3), 331-41 (2006).

Wilson, Scott A.

Using UCS as a Surrogate Performance Standard at the NCSU NPL Site — David E. Schaad, James M. Halley, and Scott A. Wilson; 132 (10), 1355-65 (2006).

Woodruff, Paul H.

Educating Engineers to Create a Sustainable Future — Paul H. Woodruff; 132 (4), 434-44 (2006).

Wozniak, Chenine

Biotreatment of Surfactant Flush Wastewater from Wood Treatment Soil — Todd L. Cort, Sung-Kil Park, Chenine Wozniak, and Angela R. Bielefeldt; 132 (1), 112-9 (2006).

Wrenn, Brian A.

Effects of Nutrient Source and Supply on Crude Oil Biodegradation in Continuous-Flow Beach Microcosms — Brian A. Wrenn, Kathryn L. Sarnecki, Eugene S. Kohar, Kenneth Lee, and Albert D. Venosa; 132 (1), 75-84 (2006).

Wu, Jane-Yii

Simultaneous Removal of Carbon and Nitrogen from Swine Wastewater Using an Immobilized-Cell Reactor — Yun-Huin Lin, Sz-Chwun John Hwang, Jane-Yii Wu, Feng-Yueh Chang, and Kuo-Cheng Chen; 132 (3), 423-9 (2006).

Wu, Yeong S.

Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Xagoraraki, Irene

Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Xu, Hui

Errata for "Derivation of a General Adsorption Isotherm Model" by Y. Liu, H. Xu, and J. H. Tay — Yu Liu, Hui Xu, and Joo-Hwa Tay; 132 (1), 147 (2006).

Yaman, Cevat

Wastewater Treatment with Biomass Attached to Porous Geotextile Baffles — Eyüp Nafiz Korkut, Joseph P. Martin, and Cevat Yaman; 132 (2), 284-8 (2006).

Yan, J. M.

Contaminant Transport Model for Unsaturated Soil Using Fuzzy Approach — J. M. Yan, K. Vairavamoorthy, and S. D. Gorantiwar; 132 (11), 1489-97 (2006).

Yan, Xi-Luan

Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Yanful, Ernest K.

Biodegradability of Surfactants under Aerobic, Anoxic, and Anaerobic Conditions — Prasanna K. Mohan, George Nakhla, and Ernest K. Yanful; 132 (2), 279-83 (2006).

Yao, Jun

Simultaneous and Sequential Photosonolysis of TCE and PCE — Chikashi Sato and Jun Yao; 132 (1), 32-41 (2006).

Yazbek, Waël

Adsorption and Desorption of Volatile Organic Compounds in Fluidized Bed — Waël Yazbek, Pascaline Pré, and Arnaud Delebarre; 132 (5), 442-52 (2006).

Yi, Taewoo

Role of Particle Size and Ammonium Oxidation in Removal of 17α-Ethinyl Estradiol in Bioreactors — Taewoo Yi, Willie F. Harper Jr., R. David Holbrook, and Nancy G. Love; 132 (11), 1527-9 (2006).

Yin, Hao

Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Yonge, David R.

Bioreduction of Hexavalent Chromium in Flow-Through Quartz Sand Columns — Mahbub Alam, Md. Akram Hossain, David R. Yonge, Brent M. Peyton, and James N. Petersen; 132 (3), 358-66 (2006).

Yoo, H. Harold
EDTA, NTA, Alkylphenol Ethoxylate and DOC Attenuation during Soil Aquifer Treatment — H. Harold Yoo, Jennifer H. Miller, Kevin Lansey, and Martin Reinhard; 132 (6), 674-82 (2006).

You, Sheng-Jie
Effect of Cd(II) on Different Bacterial Species Present in a Single Sludge Activated Sludge Process for Carbon and Nutrient Removal — Yung-Pin Tsai, Sheng-Jie You, Tzu-Yi Pai, and Ko-Wei Chen; 132 (2), 173-80 (2006).

Young, James C.
Critical Analysis of Computing Equations for Determination of BOD by Dilution Methods — Chow F. Chiang, Yeong S. Wu, and James C. Young; 132 (5), 470-8 (2006).

Young, Thomas M.
Measured and Predicted Herbicide Removal by Mulch — Xinjiang Huang, Arash Massoudieh, and Thomas M. Young; 132 (8), 918-25 (2006).

Yu, Han-Qing
Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu, Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Yu, Xueyuan
Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Yuan, Pao-Chiang
TCLP Heavy Metal Leaching of Personal Computer Components — Yadong Li, Jay B. Richardson, Aaron K. Walker, and Pao-Chiang Yuan; 132 (4), 497-504 (2006).

Zaritzky, Noemí
Effect of Ozone on Filamentous Bulking in a Laboratory Scale Activated Sludge Reactor Using Respirometry and INT-Dehydrogenase Activity — Alejandro Caravelli, Leda Giannuzzi, and Noemí Zaritzky; 132 (9), 1001-10 (2006).

Zeier, Benjamim
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).

Zeng, Hui
Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Zengin, Gulsum Emel
Respirometric Assessment of Primary Sludge Fermentation Products — Emine Ubay Cokgor, Gulsum Emel Zengin, Didem Okutman Tas, Seda Oktay, Clifford Randall, and Derin Orhon; 132 (1), 68-74 (2006).

Zhang, Bao
Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Zhang, Shu-Juan
Impact of Inherent Factors on the Radiolytic Degradation of Biorefractory Contaminants — Shu-Juan Zhang, Han-Qing Yu Hao Yin, and Qian-Rong Li; 132 (11), 1518-22 (2006).

Zhang, Tian C.
Engineering Decision: An Important Issue in Engineering Education — Tian C. Zhang; 132 (3), 289-90 (2006).

Effects of Surface-Bound Fe^{2+} on Nitrate Reduction and Transformation of Iron Oxide(s) in Zero-Valent Iron Systems at Near-Neutral pH — Tian C. Zhang and Yong H. Huang; 132 (5), 527-36 (2006).

Development of a Response Surface for Prediction of Nitrate Removal in Sulfur–Limestone Autotrophic Denitrification Fixed-Bed Reactors — Tian C. Zhang and Hui Zeng; 132 (9), 1068-72 (2006).

Zhang, Weihua
EDTA-Enhanced Washing for Remediation of Pb- and/or Zn-Contaminated Soils — Weihua Zhang and Irene M. C. Lo; 132 (10), 1282-8 (2006).

Zhang, Yiqiang
Factors Influencing Arsenite Removal by Zero-Valent Iron — Xueyuan Yu, Christopher Amrhein, Yiqiang Zhang, and Mark R. Matsumoto; 132 (11), 1459-69 (2006).

Zhao, Xianda
Hydraulic Conductivity of Soil Sorptive Zones Created by In Situ Injection of a Cationic Surfactant — W. James Gellner, II, Xianda Zhao, Matthew Girand, Stephen A. Boyd, and Thomas C. Voice; 132 (12), 1659-63 (2006).

Zhong, L.
Development of a Field Design for In Situ Gaseous Treatment of Sediment Based on Laboratory Column Test Data — E. C. Thornton, L. Zhong, and M. Oostrom; 132 (12), 1626-32 (2006).

Zhou, Hongde
Modeling Water Movement and Flux from Membrane Pervaporation Systems for Wastewater Microirrigation — Edgar Quiñones-Bolaños and Hongde Zhou; 132 (9), 1011-8 (2006).

Zhou, Ping
Treatment of High-Strength Pharmaceutical Wastewater and Removal of Antibiotics in Anaerobic and Aerobic Biological Treatment Processes — Ping Zhou, Chengyi Su, Binwei Li, and Yi Qian; 132 (1), 129-36 (2006).

Zhu, Jian-Hang
Simultaneous Removal of Phenol and Nitrate in an Anaerobic Bioreactor — Jian-Hang Zhu, Jin-Ping Lin, Bao Zhang, Xi-Luan Yan, and Zan-Guo Peng; 132 (9), 1073-7 (2006).

Zipper, Carl E.
Quantifying Long-Term NPS Pollutant Flux in an Urbanizing Watershed — Mark Dougherty, Randel L. Dymond, Thomas J. Grizzard Jr., Adil N. Godrej, Carl E. Zipper, and John Randolph; 132 (4), 547-54 (2006).

Zoh, Kyung-Duk
Estimating Pollutant Mass Accumulation on Highways during Dry Periods — Lee-Hyung Kim, Kyung-Duk Zoh, Sang-man Jeong, Masoud Kayhanian, and Michael K. Stenstrom; 132 (9), 985-93 (2006).

Zoller, U.
Water Reuse/Recycling and Reclamation in Semiarid Zones: The Israeli Case of Salination and "Hard" Surfactants Pollution of Aquifers — U. Zoller; 132 (6), 683-8 (2006).

Zou, Rui
Integrated Hydrodynamic and Water Quality Modeling System to Support Nutrient Total Maximum Daily Load Development for Wissahickon Creek, Pennsylvania — Rui Zou, Stephen Carter, Leslie Shoemaker, Andrew Parker, and Thomas Henry; 132 (4), 555-66 (2006).

Zulliger, Kimberly
Inactivation Kinetics of the Cyanobacterial Toxin Microcystin-LR by Free Chlorine — Irene Xagoraraki, Gregory W. Harrington, Kimberly Zulliger, Benjamim Zeier, William Krick, Dawn A. Karner, Jon H. Standridge, and Judy Westrick; 132 (7), 818-23 (2006).
